V(D). Planned Program (Activity)

1. Brief description of the Activity

Through advanced trainings, Master Gardeners will learn how to monitor, how to notice unusual symptoms, learn how to collect, package and send samples, and how to rule out false cases. After the training, Master Gardeners will educate the public through a variety of methods: plant clinics, workshops, speaking engagements, publish and distribute literature i.e. brochures, fact sheets etc. to inform D.C. Residents of Sudden Oak Death.

Conduct 3 evening trainings on plant pathology and Sudden Oak Death Detector Training by trained Plant Pathologist and Certified Arborist for Master Gardeners for D.C. Residents to be educated in the symptoms of Sudden Oak Death on host plants and Oak trees. After plant material is identified, D.C. Residents are encouraged to send infected samples to the Maryland Department of Agriculture Plant Pathology Lab for testing.

2. Brief description of the target audience

District of Columbia residents
