V(H). Planned Program (External Factors)

External factors which affected outcomes

Appropriations changes

Brief Explanation

The number of children/youth developing life skills and improving knowledge is estimated conservatively based on previous studies. The estimate is that at least 85% of 4-H club members accomplish these outcomes.

MSU overestimated the overall efforts we would undertake in this program. This has been addressed in the 2009-2013 and subsequent plans. This population is being reached, but the numbers are showing up in other 4-H areas (military & club program). That is why this program has been combined with others in the 4-H area in future plans of work.

V(I). Planned Program (Evaluation Studies and Data Collection)

1. Evaluation Studies Planned

Retrospective (post program)

Comparisons between program participants (individuals,group,organizations) and non-participants
